

Benchmark evidence and review-budget context

Ranking metrics and operating-point metrics are grouped separately because they answer different questions.

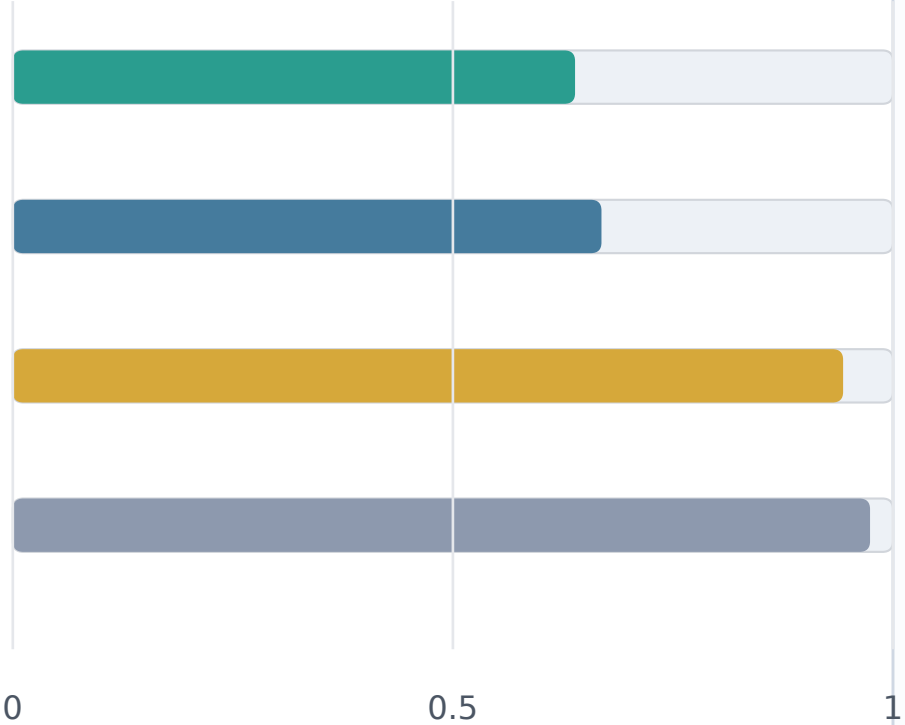

Panel A: PR-AUC ranking evidence

PaySim
synthetic temporal proxy

Elliptic
temporal graph features

Elliptic2
context only

RevClassifyDS
external reference

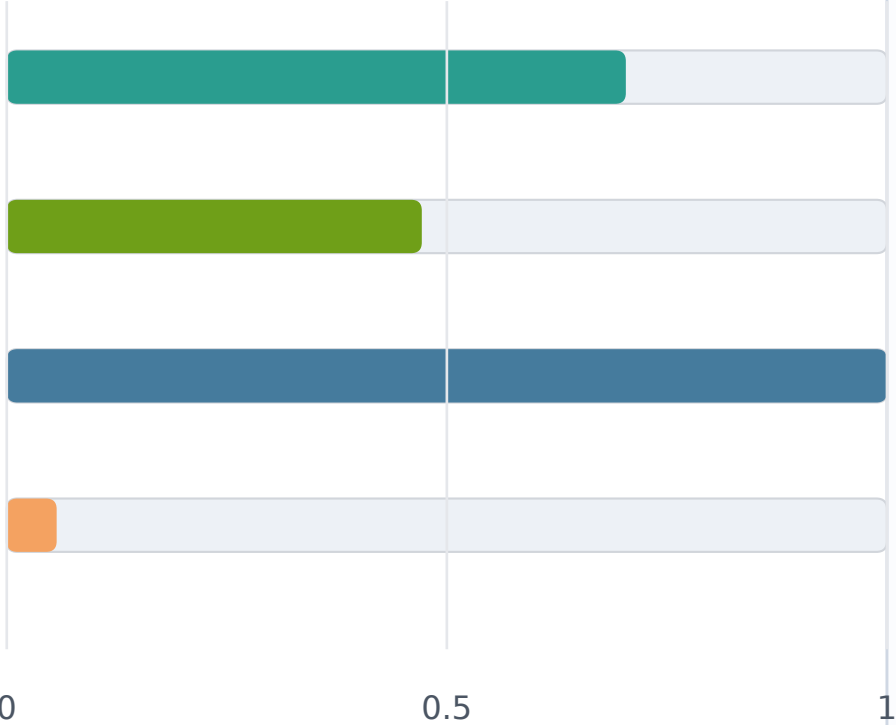

Panel B: fixed review queue

PaySim precision
top queue

PaySim recall
reviewed fraud

Elliptic precision
top queue

Elliptic recall
reviewed illicit

Elliptic2 is shown as context only. Precision/recall rows use the validation-selected review-budget policy.
