

# Evidence-cell facts

Evidence cells store metric facts; claim gates store admissible use and missing evidence.

|                                                                 |                                                                          |                                                                  |
|-----------------------------------------------------------------|--------------------------------------------------------------------------|------------------------------------------------------------------|
| <div><b>cell_id</b><br/>paper-cell:paysim...test_pr_auc</div>   | <div><b>dataset_id</b><br/>PaySim / Elliptic / Elliptic2</div>           | <div><b>split</b><br/>train, validation, test, official</div>    |
