

Rows can be useful evidence while still failing stronger claim gates.

	current evidence	blocked claim	evidence needed
PaySim	current: synthetic temporal proxy	blocked: real-bank superiority	unlock: partner/real holdout
Elliptic	current: temporal graph features	blocked: graph-neural superiority	unlock: repeated graph release budget
Elliptic2	current: modern subgraph context	blocked: RevClassify parity	unlock: faithful parity + cohort proof
Operational	current: review-budget support	blocked: hard business value	unlock: same-queue incumbent

The gate preserves useful evidence while preventing unsupported promotion.
